

2/15/67

Dear Art,

Here is the data I read you over the phone. It is for release in your Friday paper and is from the documentation that will be included in WHITEWASH III: THE ARCHIVE, which is in preparation and I hope will be done in a little more than a month.

This is not the ^{skull} fragment found at the moment of the assassination by Constable Seymour Weitzman. That it wasn't found until 29 hours after the assassination and then not by any investigator is, to me, a touchstone to the character of the investigation at the scene of the crime.

If you want to ask me anything about this, I'll be leaving here tomorrow about 4:30. We're dining in Frederick and will then be at the Thomas Johnson High School. It is in addressing the PTA there that I shall be releasing this document.

Next Thursday night I'm addressing the Frederick Civitans. ^{have} They ~~also~~ invited the Lions to join them. Do not make any advance reference to it, but on that occasion I shall be releasing another hitherto secret FBI report that reveals the size of the bullet fragment in Governor Connally's leg. Speak to me before then and I'll tell you how, with it, you can destroy the so-called single-bullet theory that, if wrong, destroys the entire Report.

If your paper is interested, perhaps from time to time I can find a goodie for you. I have perhaps 500 pages of them right now. My hope, of course, is to keep this thing in focus, to direct attention away from the "Manchester slush and to the fact of the assassination and its "investigation".

Sincerely,

Harold Weisberg
